

Welcome to the ThermoChamp Accredited Installer Training Program

Thank you for registering to become a certified installer of our products. We trust this is an enjoyable and rewarding experience for you.

Underfloor Heating is fast become the most popular way of heating any space. Designed to be energy efficient, provide on-demand heating and give the most comfortable feel to any room, there is certainly an increasing demand for this amazing product.

Thermogroup have a proud history as a manufacturer and wholesaler of Electric Underfloor Heating. We manufacture our system in-house in Germany, which gives us complete control over the quality of our systems.

Every system is tested in excess of 2400 volts before it leaves the factory. Our Thermonet Underfloor Heating system is the only Underfloor Heating product on the Australian market that is backed by a lifetime warranty. It's the peace of mind that everyone needs from an Underfloor Heating system.

The Thermogroup installer training program is one of the most advanced programs available and connects you into a support network for installing Underfloor Heating. Whether it be accessing install videos, install guides, registering warranties or connecting on a shared screen with a Thermogroup representative, you will find an unmatched level of support.

What's in it for you?

We believe that becoming an accredited Underfloor Heating installer is a key opportunity. There are Three key aspects which we believe will be of benefit to you.

Earn more money

Installing Underfloor Heating is a well-paid job for a relatively simple and straight forward process. If you were to offer to install Underfloor Heating on every home that you worked on, you could increase the income from every job. Underfloor Heating can truly help you put food on your table.

Give your customer and yourself confidence

Our installer program is designed to give you the skills and confidence that you need to install a system and know that it is done right. Not only are you confident with yourself but you can have confidence in the system and warranties that back you up.

Receive real-time live support

This training course is designed to make you qualified and confident but we don't leave you there. We provide you with real time human support so whether it be working out what you need, answering technical questions that customers may have or talking through an install on site, we have your back.

That is just the start of the benefits of being a certified Thermogroup installer.

We look forward to taking you on this journey to becoming the next member of our installer network.

Welcome aboard!

Warm Regards
The Thermogroup Team

The Process

Register to become a certified installer

Your registration will be reviewed by one of the team

- Easy to register warranty form with the ability to save your install images
- Easy to use Underfloor Heating tools
- Download install instructions
- Thermogroup contact details for real time support
- Join a live video call meeting for install support
- Request marketing support material
- Free quick quotes

Thermochamp Training Portal

The Thermochamp Training Portal is an online course. This training course consists of 13 lessons across four modules. We will go through the basics of installing Underfloor Heating before we dive into to specifics of each system. This is followed by a discussion on the other components of Underfloor Heating and an explainer video on the Thermochamp portal which you will have access to after the completion of this course.

Promotion Packs

Being able to sell the Underfloor Heating to your client is the key part of the process. We believe that being able to give your customer information that they can read about the floor heating will be extremely powerful.

We work with you to create a promotion package combining some of our marketing literature. This is something that you can give to each customer you work with for them to read. This will help to increase your Underfloor Heating sales.

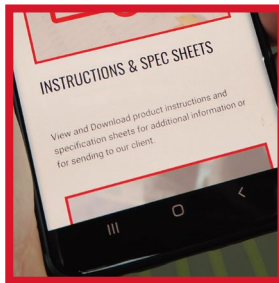

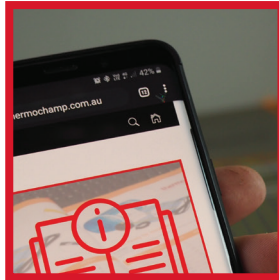

Receive leads for installs

We want to make it clear that becoming an accredited installer does not automatically mean that you will begin to receive leads from Thermogroup for installs. The purpose of the installer program is to give you the tools and confidence to add Underfloor Heating onto your existing business. If we do need an installer in your particular area, we may pass on this enquiry based on your level of support and professionalism.

Selecting your place of purchase

Thermogroup is a wholesaler so you cannot purchase directly from us. You will need to purchase our product through your local trade merchant. In the situation where they don't have an account, we will contact them to get one set up on your behalf. This way you can continue to purchase on your existing account with your tradie rebate.

Thankyou for becoming an Accredited Installer
